- Individually adjustable vertical deflection louvres. - to give sideways spread air diffusion.
- Zinc coated steel construction polyester powder coated in black - for complete corrosion protection.
- Easy two fixing hole attachment - comes complete with foam sealing gasket and fixing screws.
- Sixteen standard sizes to fit all circular ducting down to 150mm diameter.
- Double Deflection Fixed Louvre and Eggcrate variants can be manufactured together with larger sizes both on height and length

## SIZE SELECTION

Grille Type DMG

From Example:

Grille to handle 375 cfm. [0.18 m.cu.sec]

Throw 25 ft [7.5 metres]

On the nomogram join 375 cfm air volume to 25 ft throw extending line to velocity and read off 800 ft. min. [4.0 m. sec.]

Extending line back to pivot line and pivoting straight edge about this point, gives a grille size of 400 x 1250mm
